

PROGRAM

```
#include <stdio.h>
#include <sys/stat.h>
#include <unistd.h>

int main() {
    struct stat buf;

    // NOTE: Make sure a file named "1.3.c" exists in the folder
    // or change this string to a file that actually exists.
    const char *filename = "1.3.c";

    if (stat(filename, &buf) == 0) {
        printf("Total size of the file '%s' is: %ld bytes\n", filename, buf.st_size);
    } else {
        printf("Error: Could not read file stats (File may not exist).\n");
    }

    return 0;
}
```

OUTPUT

```
blackie@blackie-pc:~/GEC_PKD_IT/S4/OS_LAB/EXPERIMENT_1$ gcc 1.4.c
blackie@blackie-pc:~/GEC_PKD_IT/S4/OS_LAB/EXPERIMENT_1$ ./a.out
Total size of the file '1.3.c' is: 677 bytes
blackie@blackie-pc:~/GEC_PKD_IT/S4/OS_LAB/EXPERIMENT_1$
```
